

Window Sill Checklist

Use Generic or Unit Sheets for Window Sills

- Select the Window Sill Profile for each Window
- Verify the Sill Size
- Calculate quantities of each Sill (organized by basic Profile shape and control dimensions)
- Select stone color

This completes Checklist for Sills

Profile

The outline shape used to make a WindowSill. Shown below are some of our more common WindowSill Profile shapes. We offer more than 800 Profile shapes for you to select from.

Control Dimensions

Critical dimensions required, verifying that the profiles will fit together, or that the unit will fit where needed. Special review of setting and reference dimensions must be taken into consideration if the Sill is to be placed in coordination with other stone window surrounds.
