

## Step Profile Checklist

### Use Generic or Unit Sheets for Steps

- Select the Step Profile shape or Unit ID
- Calculate the linear footage for the installation
- Determine Riser specifications if planning to use risers.
- If using risers select the Riser Profile.
- Determine the number of each Standard Part required for installation (Cope Outside Left, Cope Outside Right, Straight)
- Calculate Part quantities
- Verify the Unit Size
- Select stone color

## Secondary Considerations

The following list of questions will help to identify situations that are not typical, but possibly critical.

- Have you decided to field miter the inside corners, or to install cast inside corners? (Cope Inside Left, Cope Inside Right)
- Have you decided to order standard sized parts, for cut in the field, or to order pre-sized parts for installation?

Have you looked at adding Pavers to your Steps as an additional enhancing product?
