The history of the Japanese garden dates back thousands of years to the very origins of the Japanese people who depended on the land for sustenance. A reverence for everything in nature developed. Trees, rocks, hillsides, the sun, the rain, etc. were each assigned a god or kami which had to be enticed to earth in order to bring good fortune. Everything is thought out and placed very carefully.

Pavers like the Diamond Colors Pavers (Unit ID 431), shown here with custom color accent tiles, are the perfect compliment to your cast stone units. Finish out your project with beautiful cast stone pavers.
