

Design Consultation

Question

What does your free design consultation services include?

Answers

1) We have selections I can put together based on our meeting that I can tailor to your needs. These can be built around styles like French, Mediterranean or Contemporary. Certain applications like landscapes, gates, and pools can be grouped to help you with selecting your preferences.

2) We will discuss budgets so you can get a feel for what you're spending while you deciding what looks best. Sometimes more ornate options don't look so good when you realize the cost is more than the alternatives.

3) After you develop some basic concepts of what your project to be, from detailed architectural plans to scribbled drawings and cut out magazine ads, send us what you have, via mail, email, or fax.

Then we review your concept with you over the phone, and we try to incorporate all your ambitions, and understand what your constraints are. We will go back and forth with you until all agree that your design is ready for production.

Our free design consultation will help you turn your concepts, your plans, and your budget and put it all together. We will look at all information you supply to us and work with you to create a finalized architectural design. Give us a call or drop us an email, and we will show you what you can really get for your money while making your project come out just the way you imagine it.
