

Design Options - Watertable

Wrap your home in beauty with the addition of a watertable

Using copes gives you a more transitional look.

Several examples of a cope outside left, cope outside right, and a straight part.

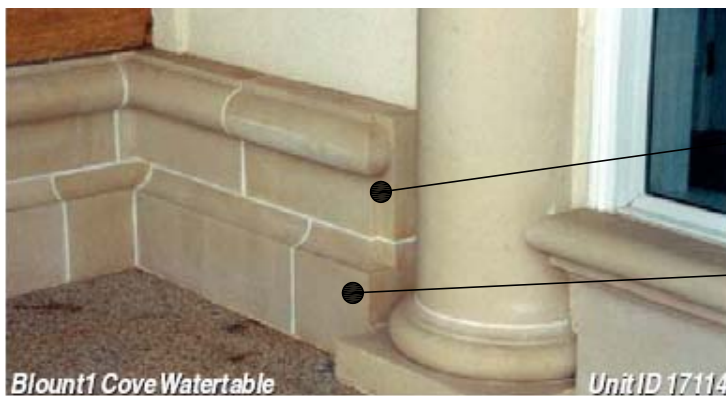

A mitered corner is another option of connecting your parts together.

This is a close up of what a cope outside left would look like

Here is an example of a backed cope. This allows a smooth end of a profile

Note how you can use the profiles to create a watertable.
